

15.6" PCAP 10 points multi-touch open frame monitor with edge-to-edge glass and IPS panel technology

The ProLite TF1633MSC-B1 uses projective capacitive touch technology, built into an eye catching bezel with edge-to-edge glass. The screen guarantees high durability, scratch-resistance, clarity and a perfect picture performance. Featuring IPS Panel Technology and Full HD (1920x1080) resolution, it offers natural, highly accurate colours and wide viewing angles. The integrated cable management system hides all the cables. In addition to the superb image quality, the screen comes with an IP54 rating, which means the screen and bezel is dust and water resistant from the front. A perfect solution for kiosk integrators and Instore Retail.

Touch technology - Capacitive

This technology uses a sensor-grid of micro-fine wires integrated into the glass that covers the screen. Touch is detected because electrical characteristics of the sensor grid change when human finger is placed on the glass. Thanks to the glass overlay this technology is highly durable, and the touch function remains unaffected even if the glass is scratched. It offers perfect picture performance and will work with human finger (also latex gloved) and stylus-pen.

Scratch resistance

Scratch resistance is essential for touch solutions used in public places and schools. This is achieved thanks to a glass overlay covering the screen. It guarantees high durability of the touch function and even more importantly the touch function remains unaffected even if the glass is scratched.
