up to 14 inches

Charging

24 internal mains sockets for manufacturer
AC adapters

Security

Individual key locks with master-key
access

Product overview

The Zioxi VCB1-24S-M-K is a high-density floor-standing charging locker for 24 Chromebooks, tablets and smaller laptops. Each device is stored in an individual key-locking compartment. A separate front-accessed electrical bay contains 24 mains sockets and space for manufacturer-supplied AC adapters, keeping chargers, heat and excess cabling away from the device compartments.

- + Individual secure storage: Each bay has a key lock, with master-key access for administration.
- + Flexible AC charging: Supports wall-plug and brick-style manufacturer power adapters.
- + Compact footprint: Provides 24 charging bays in a footprint only 530 mm wide and 460 mm deep.
- + Protected cable management: Zioxi oneClick ports present only a short charging lead inside each bay.
- + Easy installation: Front electrical access, adjustable feet and 180-degree folding doors support locker-bank installations.

Overall dimensions: 1770 H x 530 W x 460 D mm

Technical specifications

Short product code	VCB1-24S-M-K
Current UK configuration code	VCB1-24S-M-K-G-UK
Manufacturer	Zioxi
Product type	Floor-standing Volt 1:1 mains Chromebook charging locker
Device capacity	24 devices

Construction	Aluminium double-skin front and doors with a white melamine-faced MDF carcass
Chargers and cables included	No - individual device AC adapters and charging cables are required
Optional accessory	VCBST sloping-top module
Warranty	5 years; 2 years covering electrical components

Compatibility and ordering notes

- Check the complete device and case dimensions with the charging connector plugged in before ordering.
- The -M suffix identifies the mains-socket and AC-adapter-storage version.
- The -K suffix identifies individual key locks; the digital code-lock version uses the -C suffix.
- Change the -UK regional suffix to -EU for European Schuko sockets and mains lead.
