## Key features

- Secure static storage and charging for 20 Chromebooks, smaller laptops, netbooks or tablets.
- Suitable for devices with screens up to 14 in, subject to the stated shelf dimensions and power-connector position.
- Charges devices using their manufacturer-supplied AC adapters, stored in a separate secured electrical compartment.
- Zioxi oneClick cable management presents only a short length of charging cable at each shelf, keeping cables neat and difficult to remove.
- Soft-start power management is fitted as standard to reduce the risk of tripping fuses or circuit breakers at start-up.
- Doors fold back through 270 degrees and use magnetic retention for clear, unobstructed access.

# Technical specifications

CHRG-CB-20 standard key-lock configuration

|                           |                                                                                                                  |
|---------------------------|------------------------------------------------------------------------------------------------------------------|
| Manufacturer              | Zioxi                                                                                                            |
| Manufacturer part number  | CHRG-CB-20                                                                                                       |
| Product type              | Static floor-standing Chromebook charging station / charging cupboard                                            |

| Device compatibility      | Chromebooks, smaller laptops, netbooks and tablets with screens up to 14 in                                      |
| External dimensions       | 490 mm W x 500 mm D x 860 mm H                                                                                   |
| Individual shelf aperture | 255 mm W x 400 mm D x 32 mm H                                                                                    |
| Lock type                 | Key lock                                                                                                         |
| Charging method           | Manufacturer-supplied AC adapters and charging cables                                                            |
| Power management          | Soft-start power management included as standard                                                                 |
| Mains requirement         | One external power socket                                                                                        |
| Plug compatibility        | Supports UK and EU plug sockets for device AC adapters; other configurations available by request                |
| Adapters and cables       | Individual device power adapters and charging cables are not included                                            |
| Cable management          | Zioxi oneClick cable management with a secured adapter compartment                                               |
| Door access               | 270-degree fold-back doors with magnetic retention                                                               |
| Finish                    | White melamine-faced MDF carcass and doors, extruded shelves, and a dark-grey metal electrical-compartment cover |
| Warranty                  | 5 years for the cabinet; 2 years for electrical components                                                       |

## Compatibility guidance

The shelf aperture must accommodate both the device and its connected power lead. Particular care is required where the charging connector is positioned on the rear edge of the device. Confirm the device dimensions and connector placement before ordering.

Lock variants  
CHRG-CB-20 is the standard key-lock model. CHRG-CB-20-C uses a digital code lock. An RFID card / fob version is available as CHRG-CB-20-R.
