LAN Control

LAN Control¹

LAN control provides the ability for IT technicians to remotely control multiple projectors via RJ45 LAN port. Once the projectors are connected to the network, IT technicians could either monitor the status or manage the setting simultaneously from IT center. The support system includes Crestron, Extron, AMX, PJ-Link, HTTP and Telenet.

4 Corner Correction

4 Corner Correction

4-Corner keystone correction enables correcting horizontal and vertical distortions easily by simply adjusting the positions of the 4 corners of the projected image, so the audience sees a rectangular image even if the projector is placed to the left, right, above or below the screen.

24/7 Operation

24/7 Operation

The projector supports 24 hours-7 days of continuous projection when prolonged periods of use is required. This is especially useful for public display or museum exhibition.

Zoom Ratio

1.3X Zoom Ratio

Featuring a 1.3x optical zoom lens, the projector offers users the flexibility to select the optimal installation spot within a broader throw distance range, allowing for the perfect image size without disrupting the existing interior design. 1.3x Optical Zoom.
