NovoConnect™ USB Ethernet Adapter

The NovoConnect USB 2.0 Ethernet adapter enables seamless, fast 10/100Mbps bandwidth performance and reliable wired connection between NovoConnect and the environment's LAN based network. This gives the best possible connection with no requirements to change the default network setting and make a presentation with the NovoConnect. The performance increases since any WiFi from the client's computer or tablet is handled by the organization's existing WiFi network. Simultaneously the NovoConnect can be configured to host a direct guest WiFi network for visitors separate from the organization's LAN based network, keeping company data and network infrastructure secure at the same time allowing guests to present wirelessly with NovoConnect.

FEATURES

- Wired Ethernet connection enabling fast and reliable 10/100Mbps bandwidth performance
- Allows for convenient and efficient sharing between two separate networks: Guest WiFi and employee LAN networks
- Fully compliant with IEEE802.3 network standards
- Full-duplex or half-duplex operation support
- USB 2.0 specification compliant with backward USB 1.1 compatibility
- Compact all-in-one design with built-in 80mm USB cable
- No external power adapter required
- Supports Windows® or Mac® operating systems

SPECIFICATIONS

Model Number	NovoConnect™ USB Ethernet Adaptor
Product Compatibility	NovoConnect™ B360
Network Standards	IEEE802.3
Connectivity Speed	10/100Mbps
Hardware Interface	USB 2.0 Type A (USB 1.1 Backwards compatibility), RJ-45
Power Source	Bus Power
LED Indicators	Power, Link
Operating Temperature	0°C - 45°C
System Requirements	Windows® 8/7/Vista/XP/ 2000, Mac® OS 10.3x and above
Available Color	White
Package Contents	USB Ethernet Adaptor
Weight	17g (0.6 ounces)
Dimensions (L x W x H)	62mm x 26mm x 16mm (2.4' x 1' x 0.6')
