))OCCULIGHTS

Empowering employee productivity and focus
with room occupancy lights

Introduction
Occulights is a Norwegian technology company who creates useful workplace technology that increase efficiency, reduce interruptions, and give decision making data on room utilization.
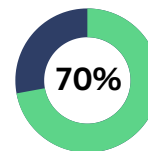

Todays challenge
Small meeting rooms, focus rooms and non-bookable rooms lack visual indications on room occupancy - leading to disruptions and inefficient room utilization. This has a massive impact on the productivity of your employees.
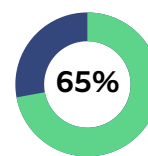

The Solution
Prevent room interruptions with visual occupancy lights, indicating if a room is in use or not. Occulights is an out-of-the-box solution, that gives instant value in employee productivity and efficiency
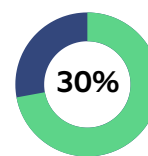

Market Analysis

70% — Approximately 70% of non-bookable rooms and focus rooms does not have any visual indication of availability

65% — A staggering 65% of employees feel that interruptions is effecting their productivity

30% — When used correctly, visualization of room occupancy can lead to up to 30% higher employee productivity

Reduce interruptions
A study out of University of California states that it on average takes 23 minutes to regain focus after being interrupted, when doing focused work. These interruptions has a substantial effect on your employees efficiency.

Efficient room utilization
Help facilitate efficient room utilization through clear visual indications on room availability with Occulights

Make data driven workspace decisions
Gather data on your room utilization to make better decisions regarding your workspace. Integrate with the analytics platform of your choice, or leverage our cloud platform for insights on room usage.

Key features

- The only out-of-the-box solution, including a sensor and occupancy light

- Visualize room occupancy to reduce disruptions and drive productivity

- Harvest data on room utilization for better workspace decisions

- Easy deployment through phone or computer, with a few clicks using our multi-room deployment feature

- Powered Over Ethernet (PoE)

- Exclusive design to fit the modern day workspace

- Integrate with third party solutions through our open API

- Configure and monitor devices through our cloud platform

- No programming needed
