

# Yealink MVC MCoreKit-C5U Datasheet

## Basic Component of Microsoft Teams Room System

The Yealink MCoreKit-C5U is a state-of-the-art solution designed to elevate Microsoft Teams Rooms, delivering a seamless and intelligent video conferencing experience. This powerful combination integrates the high-performance Mini-PC MCore 4, the intuitive large-screen touch panel MTouch Plus, and the detect sensor RoomSensor, working in unison to enable seamless automation and intelligent integration within conference rooms.

The MCoreKit-C5U ensures a smooth and efficient meeting experience with its native Microsoft Teams user interface, allowing users to effortlessly start and manage meetings with one-click controls. Powered by the Intel Ultra5 125H processor, the MCore 4 delivers outstanding data processing capabilities and powerful AI computing power, offering every participant an immersive video conferencing experience. Additionally, to streamline meeting control, the MTouch Plus features an 11.6-inch touch interface for intuitive device operation, while the RoomSensor intelligently detects the occupancy status of the meeting room and simultaneously displays real-time environmental metrics like temperature and humidity on the MTouch Plus interface, delivering intelligent room management solutions.

To cater to diverse meeting scenarios, the MCoreKit-C5U supports flexible connectivity options for audio devices and cameras, allowing users to choose between wired or wireless configurations. It also supports both wired and wireless screen sharing, enabling participants to share content effortlessly and enhance collaboration. Meanwhile, the system's simple deployment and remote management capabilities make it easy to install and maintain, reducing setup time and operational complexity.

## Key Features and Benefits

### Seamless Meeting Experience with Native Microsoft Teams Integration

The entire MCoreKit-C5U bundle is equipped with a native Microsoft Teams user interface, ensuring a familiar and intuitive experience for users. The MTouch Plus touch panel provides easy access to one-click conferencing, call control, camera adjustments, and content sharing, while the RoomSensor automatically monitors the meeting room's occupancy status. This seamless integration ensures that meetings start effortlessly and run efficiently, enhancing productivity and collaboration.

### Outstanding Data Processing Capability

At the core of the MCoreKit-C5U is the MCore 4, powered by the Intel Ultra5 125H processor, boasting exceptional data processing capabilities and powerful AI computing capability with its NPU. It ensures smooth and efficient meetings, enabling intelligent conferencing features. The MCore 4 empowers smart meeting rooms, providing a stable and efficient operating environment for immersive remote communication.

### Real-Time Content Sharing for Enhanced Collaboration

The bundle supports both wired and wireless content sharing for maximum flexibility. Wireless content sharing is made simple with the WPP30 adapter, enabling one-click sharing at 1080P/30fps resolution for a superior viewing experience. Wired sharing is also available via USB-C or HDMI ports. Additionally, the MCore 4 is equipped with an HDMI-In interface,

supporting 4K resolution auxiliary stream input to ensure lossless image presentation, further enhancing the content sharing experience.

### **Flexible Audio and Connectivity Options**

The MCore 4 is equipped with a rich array of ports, including VCH, USB, and HDMI-In, providing versatile connectivity options for various peripherals. Users can choose between wired or wireless microphones, ensuring crystal-clear audio quality in any environment. The MCore 4 also supports seamless connectivity with camera devices such as the SmartVision 80 and UVC86 via the VCH port, or the AVHub via the USB-B port. When multiple cameras are connected to the AVHub, the system expands its range of connected video devices, enabling single or multi-camera AI tracking modes to intelligently frame each active participant. This flexibility ensures that the MCoreKit-C5U can adapt to diverse meeting scenarios, from small huddles to extra-large conference rooms, delivering a tailored and immersive experience.

### **Simple Deployment and Easy Use**

The MCore 4 and MTouch Plus offer multiple installation options, allowing users to choose the most suitable deployment method based on the actual layout of the meeting room. With flexible installation methods, these devices can be positioned to make full use of every corner of the conference space. A single CAT5e cable is sufficient to connect the MCore 4 and MTouch Plus, enabling both data transmission and power supply without the need for additional cables or power sources. Additionally, the RoomSensor operates via Bluetooth (BLE), eliminating the need for extra cables to reduce the complexity of cabling and simplifying device deployment, making the system easier to install and maintain.

### **Remote Device Management**

These devices can support the Yealink Device Management Platform/Cloud Service, enabling remote management, monitoring, configuration, updates, and diagnostics of all connected devices. This feature ensures that your meeting room is always up-to-date and operating at peak performance.

## **Specifications**

Parameter	Description
Package content	<ul style="list-style-type: none"><li>• MCore 4, Gen-4 Mini-PC</li><li>• MTouch Plus, Gen-3 touch panel</li><li>• RoomSensor</li></ul>
Preload	<ul style="list-style-type: none"><li>• Windows 11 IoT enterprise X64</li><li>• Windows 11 IoT enterprise license</li></ul>

	<ul style="list-style-type: none"> <li>• Microsoft Teams rooms app</li> <li>• Yealink RoomConnect</li> </ul>
