

SONY

Your total touchscreen solution

Touch overlays for BRAVIA Professional Displays

Engage audiences with a touch

Transform your BRAVIA Professional Display* into a super-size touch enabled interactive terminal with a choice of responsive, high quality touchscreen overlays.

* BRAVIA Professional Display available separately

Responsive, accurate multi-touch performance

Audience engagement is right at your fingertips. Customers and colleagues can't keep their hands off these big, beautiful screens: 10 multi-touch points ensure accurate, responsive performance across the entire display area.

Wide range of screen size options

Go as large as you like. There's a full range of touch-enabled BRAVIA Professional Display solutions in screen sizes from 43" right up to 100" – all offering fabulous contrast, rich colours and exquisite detail in 4K.

* Capacitive models up to 75"

Add that finishing touch

We offer a choice of touchscreen overlay solutions from Infrared to Capacitive to suit a wide range of interactive applications for corporate and educational environments.

Big audience appeal, low running costs

Powered by direct USB connection, the energy-efficient touch overlay keeps running costs down.

In touch with your customers everywhere

Touch-enabled BRAVIA Professional Displays* are ideal for a wide range of interactive signage and information kiosk applications – from schools, universities, museums, libraries, boardrooms and offices to hotel lobbies, hospitality zones, retail stores and visitor attractions.

* BRAVIA Professional Display available separately

Looks great in every light

The touch overlay's tough anti-glare surface ensures optimum visibility, even in the sunniest environments.

Quick and easy to install and set up

Simple, fuss-free installation and set up allows deployment of your interactive touchscreen solution in minutes.

Inform, entertain and engage customers and colleagues with the power of touch

Infrared

Infrared overlay models use highly reliable infrared technology. This detects when infrared beams concealed in the overlay are interrupted by a finger or other solid object. This affordable solution offers smooth gesture recognition and accurate, low-lag touch response under any ambient lighting conditions.

Capacitive

Capacitive overlay models use capacitive technology – as found in tablets and smartphones – that directly senses physical proximity of the user's finger or a stylus. This allows extremely rapid response and smooth, speedy gesture recognition in an extremely slim bezel-free design.

Service and support

All Sony Professional touch overlays sold into the EU, Norway and Switzerland come supplied with a 3 Year PrimeSupport pack, offering unique services and benefits, including:

- Freephone telephone helpdesk support (00 800 7898 7898) in 5 languages.
- Receive a completely new replacement model rather than repair as standard.

PrimeSupport
